Installment Opportunity Share

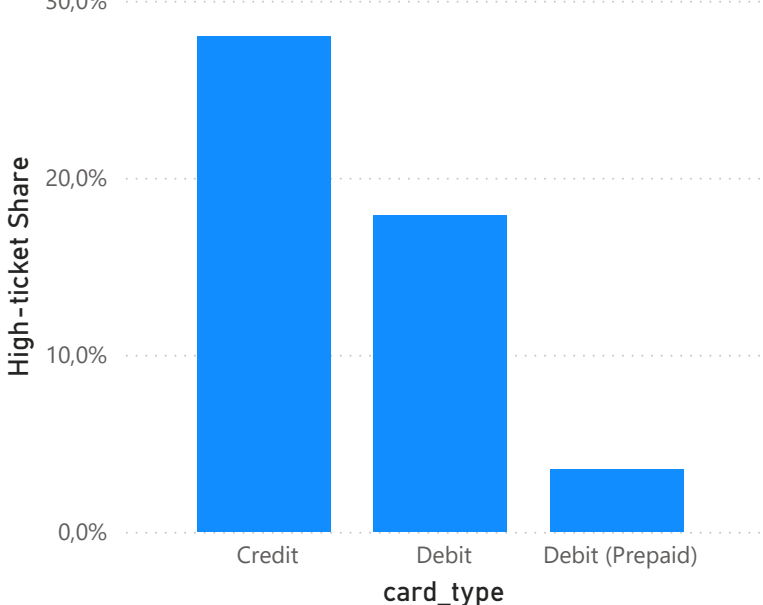

Total Purchase Volume by Card Type

Average Purchase Amount by Card Type

High-ticket Share by Card Type

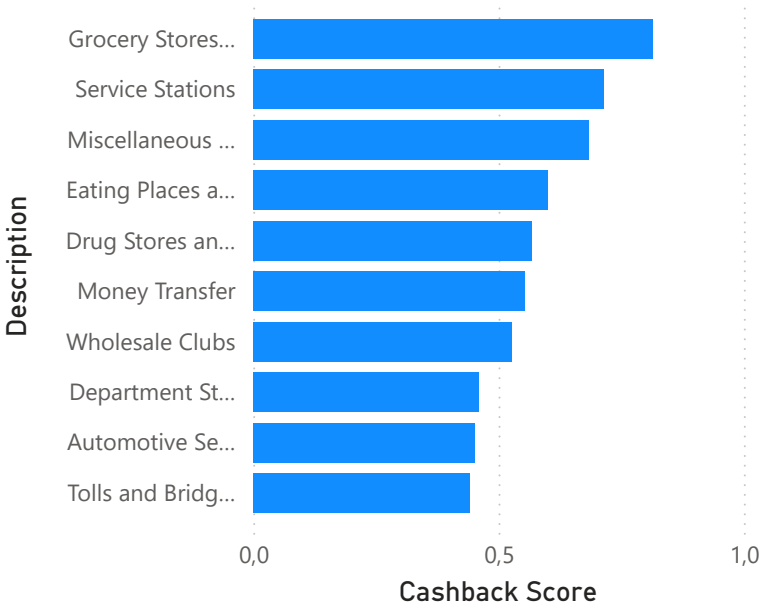

The dataset includes over 13M transactions and \$639M in purchase volume. Credit cards show higher average purchase amounts and a higher share of high-ticket transactions.

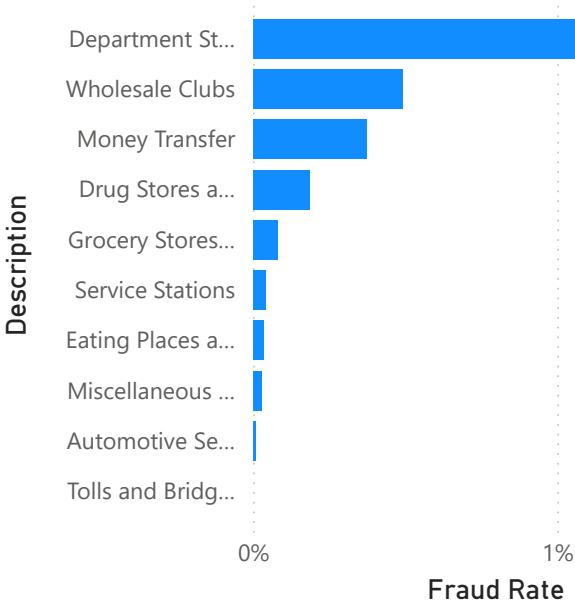

Cashback Categories

Category scoring based on frequency, reach, repeat behavior, volume, and fraud risk

Top Cashback Category Candidates

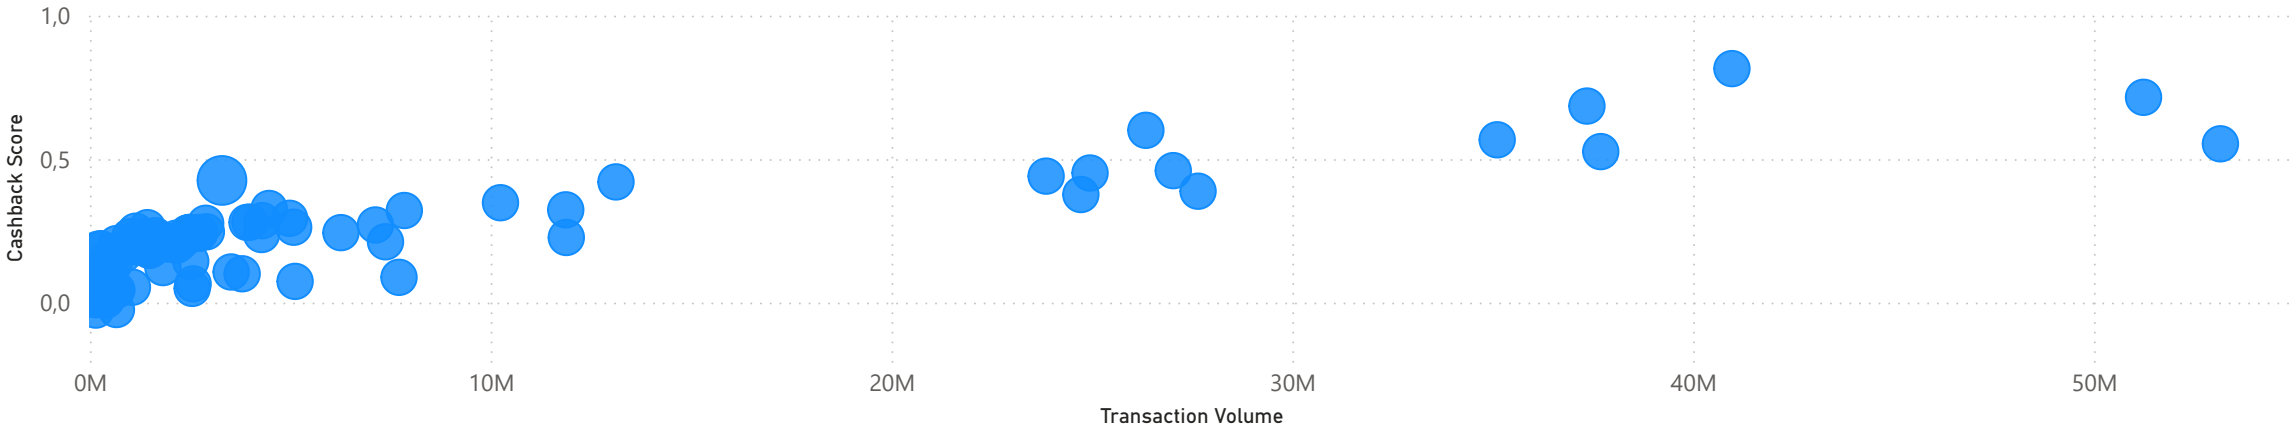

Fraud rate by cashback category

Customer Reach by Cashback Category

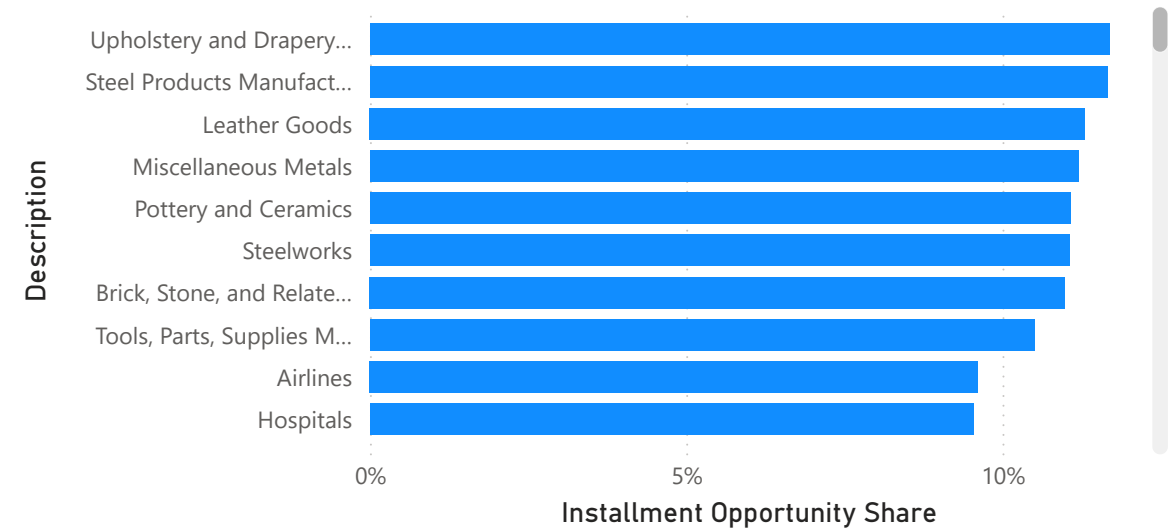

Transaction Volume vs Cashback Score

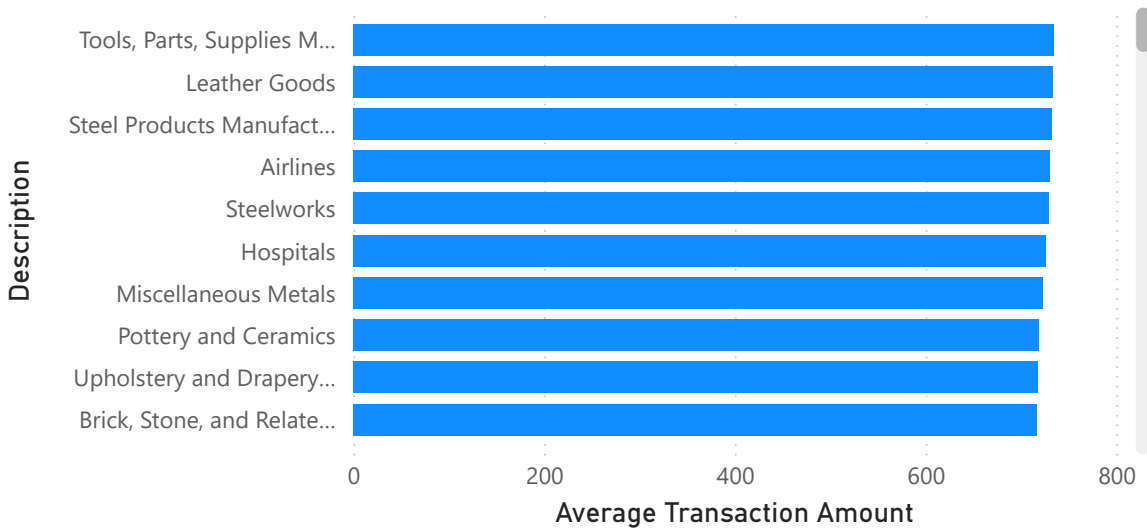

Everyday categories such as groceries, gas stations, restaurants, and pharmacies are strong cashback candidates due to high frequency, broad customer reach, and relatively low fraud risk.

Installment Opportunities

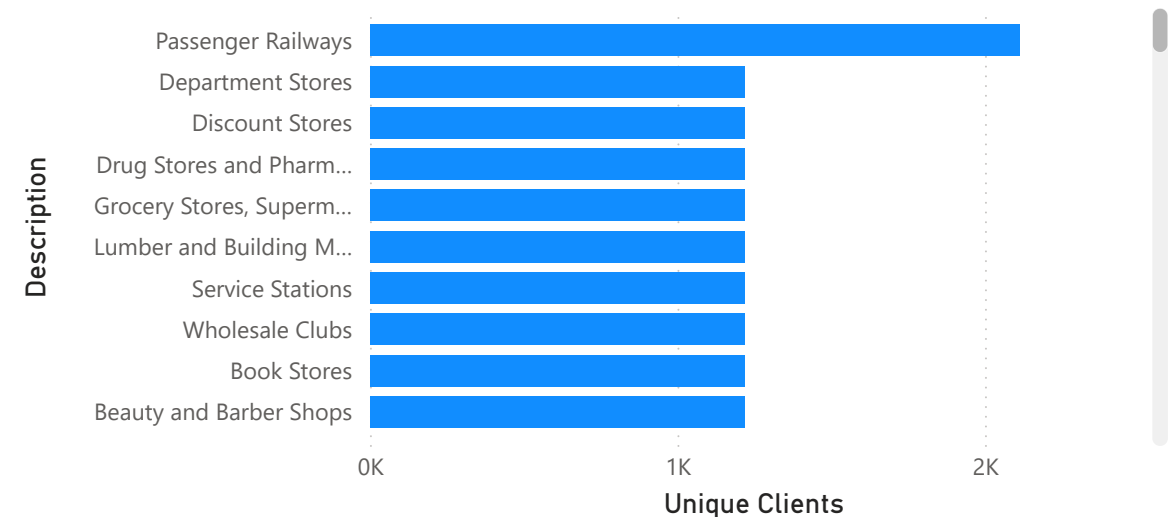

Top Categories by Installment Opportunity Share

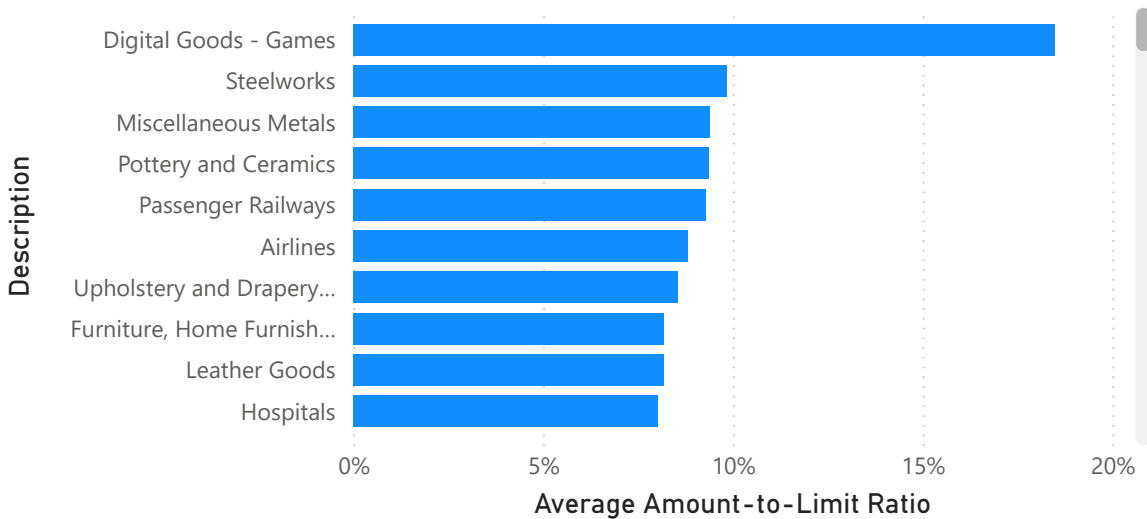

Average Transaction Amount by Category

Customer Reach by Installment Category

Average Amount-to-Limit Ratio by Category

Installment opportunities are concentrated in high-value credit card purchases, especially in travel, healthcare, legal, automotive, and selected home-related categories. Customer reach varies across categories, which suggests that installment campaigns should consider both transaction value and category scale.
